- A total project management process
- Our work can be planned around your operating hours
- Our structures are designed to protect from sun, rain, hail and wind
- We combine the best quality assurance practices

Disney Shades

The fabrics we use for sail shades provide UV protection for you and your family. They are easy to install and clean. They significantly reduce temperatures and are manufactured using heavy duty commercial grade fabrics for extra strength. Shade sails are available in different sizes and different shapes in order to protect your garden, terrace etc.

Our SHADE SAILS are also manufactured to withstand the toughest of weather conditions.

They can be attached directly to buildings or attached to specially installed posts that will not move in the toughest conditions.

Disney Shades

Garden and pool parasols can be used to protect children from the sun, offer privacy from neighbours and shelter dining Place. For a more traditional look, wooden parasols are the ideal choice for your garden or patio area. They are very sturdy and solid. Aluminum and Stainless Steel garden parasols have a more modern look and also bring the added benefits of being weather resistant, low maintenance and rust proof.

Garden and pool umbrellas are in huge demand in the recent times. People prefer them for conducting outdoor parties, picnics and occasions. Beside this open restaurants, cafe and lounges use these umbrellas for setting up outdoor tables.
